

Crop:

On the desired page, Select the Crop button from the bottom tool bar, and the App will be in Crop Mode, from here select the shape of the Crop you want to i.e. Freeform, Box or Circle shape. Then either save the Cropped Image for later use or send it as it to either Facebook, Twitter, Photo Album, Printer, Email, MMS or other Applications.

Paste:

Select the Paste button from the bottom tool bar, and the App goes to Paste Mode; then do as you choose with it. Either select Send, and it will direct you to send to either Facebook, Twitter, Photo Album, Printer, Email, MMS or other Applications OR, select Paste Now, and it will paste the cropped image on the board. To paste Cropped Image on a different page, simply use the Finger & Pagination to go to the required page. You can then Increase or Decrease the size of the Pasted image, OR even Mirror Image the cropped image. Double tapping on the Cropped image, will retain the Image at the place where you have positioned it.

MIRRORING OF IMAGES

Draw

On the desired page, Select the Draw button and the screen will take you to the Draw mode of the App. Here select the Size & Color you want to use, tap on Done and then start Drawing. When finished, tap on Done again.

Write Text

On the desired page, Select the Text button and the screen will take you to the Text Mode of the App. Here select the Font or Font Size and Color and then select Write. When Write is selected, a small text box appears, tapping within the Text box pops up the Keyboard of the device. Now type or use SIRI (an Apple functionality) to type your text. To move the text, simply tap and drag the text box. To move the text to an area currently occupied by the Keyboard, Double Tap outside of the text box and the Keyboard will disappear. Now move the Text box to the desired location. When finished, simply tap on Done

Erase

On the desired page, Select the Erase button and the Erase functionality pops up. Select the thickness of the eraser, and when selected, simply tap on the “X” mark and then use the Erase function. To come out of Erase mode, Tap on the Erase button.

Undo, Redo and Undo All

On the desired page, after you have made some changes to it, Select the Undo button, and continue Tapping it, it will Undo in the order of Last in First Out. To put the Undo part back on the screen/page, simply Tap on the Redo button multiple times and the whole thing that was removed at Undo stage will come back on. The Undo All button will remove all of the written/drawn part on the page, but Redo, will make it all come back on the screen/page.

Add and Delete Pages

Select the Pages view from the bottom Toolbar of the screen, and then scroll thru the pages. Select a page and then Tap on the (+) button on the top to add a Page and Tap on the (-) button to delete a page. Please note that once a page is deleted, it cannot be undone.

Wristpad

This function is only for iPads; the Wrist pad comes on and off with a toggle of the Wrist pad button. Use 3 fingers, to tap and move the same. You can rest your wrist on this pad, so as to prevent your wrist creating any figures/ marks whilst you are drawing.

List of Icons & Functionality

(In Alphabetical Order)

	Add a Page - This functionality is to add pages either Before or After the selected page.
	Tapping this button will enable the user to go to the previous section in the Support area of the App.
